LEGAL REGULATION OF CANNABIS IN THREE STAGES

Our plan is fair and realistic. Stage One is modelled on the experience of the ACT where cannabis has been legal since 2020 with positive social and economic outcomes. Our plan recognises the need to approach the issue of cannabis regulation from a public health perspective keeping the needs of patients and consumers as a priority.

STAGE ONE: LEGAL REGULATION OF CANNABIS (PERSONAL ADULT USE) BILL

- Legal to possess up to 50 grams
- Legal to securely grow up to six plants at home – indoors or outside
- Legal access to seeds
- Social sharing (gifting) will be legal – up to 50 grams
- Carers will be allowed to grow for the person they care for
- Storage of cannabis to be inaccessible to minors
- No consumption in built-up areas or around children

STAGE TWO: LEGAL REGULATION OF CANNABIS (SOCIAL CLUBS) BILL

- Consumers can assign their home-grow rights to cannabis social club
- Clubs to be non-profit and limited to 99 members
- Licences will regulate production, safety, transport, storage and rules surrounding distribution to registered members
- All forms of advertising prohibited
- Cannabis to be provided to members in non-transparent, child-proof containers

STAGE THREE: LEGAL REGULATION OF CANNABIS (COMMERCIAL DISTRIBUTION) BILL

- Growers and retailers to be licensed
- Safety of product and cannabinoid profile to be verified by a state regulator and clearly stated on product displays and labels
- Controls on industry participants to favour small operators and exclude large corporations
- Retail outlets to be prohibited near schools
